SEAMLESS EDGE

Seamless Edge provides a smooth transition between the surface top and edge creating the illusion of a single flowing solid surface. Utilising state of the art technology, Seamless Edge creates a beautiful monolithic surface with an elegant profile.

ELEGANT

Seamless Edge creates a vanishing edge on products, displaying a seemingly endless surface. The sleek aesthetic provides an elegant, ergonomic profile.

DURABLE

By creating a monolithic surface, the Steelcase Seamless Edge has eliminated the porosity of a glue line, increasing the life of surfaces and promoting a cleaner work environment.

SUSTAINABLE

Seamless Edge provides a better alternative to conventional glue edge banding. It suppresses the use of solvents to clean glue excess on the polypropylene profile and the certified particle board material.

STATEMENT OF LINE

Seamless Edge is currently available on the following ranges in all standard shapes, both linear and curved.

Desking: Ology, Activa, FrameOne, Kalidro and B-Free desks/tables
Storage: Share It and Implicit.

SURFACE MATERIALS

Colour palette:

- G0 / 230 Crystal
- WY Snow
- AT Acacia

Colours are representative and may vary slightly from actual material.

SUSTAINABILITY

Designed by Steelcase, Seamless Edge is manufactured in Rosenheim (Germany) for the EMEA (Europe, Middle East and Africa) market.

Certifications:

PEFC - Programme for the Endorsement of Forest Certification

Low concentrations of formaldehyde in wood

Sustainability actions and results are communicated in the annual Steelcase Corporate Sustainability report.
